

# Suntile™ Roofing

 **STRATCO**

**Crafted with style, designed and manufactured with pride. Suntile Roofing is an investment in your home's future that will withstand the rigours of weather and time.**

**Your architectural dreams are brought to life with a majestic roofing masterpiece.**

## **Superior Appearance**

Stratco Suntile™ steel roof tiles are an attractive, lightweight roofing solution for your home. They feature a striking scalloped profile that will complement both modern and traditional homes.

Suntile roofing features a specially designed ridge cap. The ridge cap is unique to Stratco and offers unsurpassed good looks. Combine this design excellence with the ability to choose from a wide range of roofing colours and you have a superior product that will transform the appearance of your home. Suntile steel roofing is ideal for new residential roofing and re-roofing.

## **Ideal Roofing Solution**

You can be assured your roof will be strong and durable when you choose Suntile roof tiles as they are made from high quality coloured steel. When correctly installed, the interlocking tile panels deliver a weather tight barrier to provide you, and your home, with protection against the elements.

The tile measures 1300 x 370mm. Suntile's compact size gives you design flexibility and ease of handling, resulting in quicker installation and minimised transportation costs. The Stratco Suntile is a light weight roofing solution, weighing only 3.5kg per m<sup>2</sup>, minimising the cost of framework and making it suitable for situations where unstable ground exists.

## **Everything You Need**

Complete the look of your Suntile roof with an extensive range of Stratco roofing accessories that have been designed to complement your roof and home. Add the finishing touch with Stratco Suntile Valley Gutter, Flashings and Ridge Capping. There are four Ridge Cap profiles to choose from; as displayed in the middle of the page.

## RIDGE CAP OPTIONS

Standard Cap

Barrel Cap

Deluxe Cap

Apex Cap

Provide ventilation with a turbine ventilator and Stratco Louvred Vents; the natural way to extract heat from your home. A wide range of guttering, downpipes and steel fascia profiles are available in styles to suit traditional and modern homes. You can enhance the look of your home by mixing and matching the colour of your roof and accessories to either blend together or create a bold dramatic contrast. Special customised rainheads and metal fixtures can also be manufactured.

## The Complete Package

Stratco have been successfully installing roofing since 1978, and over this time have developed a reputation for quality workmanship with superior products and attention to detail.

Stratco has the ability to provide the complete package, from the design, take off, and quote, to supply and installation. Furthermore, only approved installers who are experienced with Stratco Suntile roofing are used, so you can be assured that you will receive a quality product that is installed correctly.

## A Quality Investment

You can be confident that you are purchasing a quality product when you choose Suntile roofing as it has been designed, engineered and tested to comply with all building code requirements and the latest standards. The Stratco commitment to innovation, quality and style will ensure that you are satisfied with your investment for many years to come. If you want a superior roof that provides genuine value for money, then Stratco Suntile roofing is the product for you.

## Low Maintenance

Stratco Suntile steel roof tiles are produced from the highest quality materials and will provide many years of service if the important recommendations set out in the Stratco 'Selection, Use and Maintenance' brochure are followed.
