Biggest Range

Stratco produces an extensive purlin range with 8 web heights and 6 thickness combinations, from 75mm to massive 400mm purlins capable of impressive spans. Fascia purlins are also available in the larger sizes. The following table shows the thicknesses available:

Thickness	WEB DEPTH IN MILLIMETRES							
	75	100	150	200	250	300	350	400
1.0mm	•	•						
1.2mm	•	•	•					
1.5mm	•	•	•	•				
1.9mm		•	•	•	•			
2.4mm		•	•	•	•	•	•	•
3.0mm						•	•	•

Installer friendly bridging system

"Rapidfix" bridging is a very fast and easy to install system developed with your installer in mind. The receiver end has a unique locator tag that allows both ends to be held in place. Installation is easier and faster for the rigger who is operating well off the ground, often in windy and difficult conditions. Rapidfix will save both time and money.

 STRATCO

Simply the best Purlins
for your project...

Stratco Rapidfix is a range of quality purlin and bridging products designed and produced by Stratco.

Stratco manufacture a complete range of structural C and Z purlins and girts for industrial buildings, garages, verandahs, and carports, in fact anywhere that strong reliable steel framing is required. Manufactured from quality galvanised steel, this is a fully integrated system allowing for flexible design options.

Supplied plain or punched, galvanised purlins are manufactured from high tensile steel for increased strength, reduced weight, and a long serviceable life.

Best Service

Stratco offers the fastest service in town. Installation of new state of the art machinery allows not only faster production times, but greater flexibility to meet your needs. A guide to standard lead times can be seen in the table below: For larger projects, some additional time may be required.

DELIVERY BY

Order by:	75mm	100mm	150mm	200mm	250mm
Mon	Frid	Thur	Wed	Wed	Thur
Tues	Frid	Thur	Mon	Mon	Thur
Wed	Frid	Tues	Mon	Mon	Fol Thur
Thurs	Tues	Tues	Mon	Mon	Fol Thur
Frid	Tues	Tues	Wed	Wed	Thur

Top Quality

Stratco purlins are crisp, clean and square and by any assessment are a quality product. There is no need to tolerate rounded corners, inaccurate lengths, or out of square purlins any more. Insist on quality Stratco purlins for your project.

Engineering Support

Stratco Engineers have carried out extensive testing on both purlins and girts, and on the "Rapidfix" bridging system. Capacity tables have been

calculated in accordance with limit state design principles and comply with Australian / New Zealand Standard AS/NZ 4600 : 1996 Cold formed steel structures, using the latest software developed by the Centre for Advanced Structural Engineering at the University of Sydney. They are your guarantee

of strength and structural sufficiency.

Competitive Price

Experienced technical Representatives are able to advise you on pricing and delivery requirements. Our pricing is competitive, and we ask only for the opportunity to provide a price for your next project.

Give Stratco purlins a try...

You have nothing to lose and everything to gain by trying Stratco purlins and girts on your next project. Quality, ease of use, service, competitiveness and personal follow up are an integral part of the Stratco offer. Ring Stratco now, and put us to the test...
