

# Double Door Cabinet Installation Instructions

## Pre-assembly Guidelines

1. Two people are required to finish the assembly.
2. Thoroughly read all instructions before starting assembly.
3. Read, understand and heed all warnings and safety instructions.
4. Plan to assemble the cabinet in the area where it will be used.  
Once fully assembled, the cabinet is difficult to move.
5. Wear proper eye protection and other applicable safety equipments while assembling.

Image	Description	Image	Description
	1pc - Door frame Arrow mark		1pc - Left side panel Arrow mark
	1pc- Right side panel Arrow mark		1pc - Back panel
	4pcs - shelf		1pc - Top plate Screw holes on rims
	1pc - Bottom plate Front cutting edges		1pc - Door with lock
	1pc - Door		2pcs - 500mm side baseboard
	1pc - 910mm front baseboard		4pcs- adjustable legs
	4pcs - fixed legs		16pcs- shelf brackets
	16pcs-M5x12 screws		4pcs - M5x6 bolts
	6pcs - M5x12 bolts		8pcs - M6x12 bolts
	1pc - hex key		4pcs - Pin
	4pcs - Plastic washer		

Step1: Attach back panel and right panel by 5pcs of M5x12 screws.

Step2: Attach back panel and left panel by 5pcs of M5x12 screws.

Step3: Attach door frame with back and side panels from inside. Please make sure frame is tightly embedded in side panels' folded edges.

Step4: Assemble top plate from inside by 6pcs of M5x12 screws. Those screw holes are on front and back rims.

Step5: Install fixed legs by M6x12 bolts and install adjustable legs later. If floor is uneven, please adjust adjustable legs by using hex key to desired height.

Step6: Cover bottom plate and fix side and front baseboards by M5x12 bolts.

Step7: Fix door with lock with pin and plastic washer by M5x6 bolts and assemble another door in the same way.

Step 8: Set shelf brackets & shelves on needed positions.
