LONG BEAM

② x 10

SHORT BEAM

③ x 8

POST

④ x 5

BRACE

⑤ x 5

WOOD BOARD
SHELF

⑥ x 8

POST CAP

⑦ x 4

COUPLER

⑧ x 2

ANTI-TIP KIT

Step 1

TIP: Please place all parts neatly in an easy-to-reach place before installation.

Add the feet (6) to the base of the vertical post (3).

Post are directional.

The slot must point down.

Step 2

Connect one short beam (2) to the bottom of two vertical post (3) leaving one key hole slot at the bottom. Connect one long beam (1) to the vertical post (3) in-line with the short beam (2) which was previously assembled. Ensure both rivets of the beams are inserted in two positions of the vertical beams.

Use a rubber mallet (not included) to secure the connections. Repeat for the two remaining sides.

Step 3

Add the brace (4). Ensure the rivets are fixed as per image. Using a flat head screwdriver, insert it into the slot and gently increase the opening width to allow for the tooth to enter. Hint: Bending the tooth inward will further secure the support in place. Install one wood board (5) on top of the assembled beams.

Step 4

For the second level, repeat steps 2 and 3 at desired height. Attach the post coupler (7) by sliding into the top of the post (3) and locking into key hole position. Use a rubber mallet (not included) to secure the connections.

Step 5

Continue working your way upward to install the remaining shelf beams at the desired heights, placing a wood board (5) onto the assembled beams when completed. Add post cap (6) onto the tops of the post (3).
